REVERSE OSMOSIS COMPACT PLANT FOR SMALL FLOWS

REF: PUR-MINIRO-BW (TDS<2.000ppm)

REF: PUR-MINIRO-SW (TDS<45.000ppm)

MICROFILTRATION + HIGH PRESSURE PUMP + RESERVE OSMOSIS + FLUSHING

Function:

- Organic matter removal, salinity, contaminating loads, ion concentration in water, and microorganisms, with high degree of efficiency.
- Characteristics of the inlet water:
 - Turbidity < 1 NTU
 - SDI < 5
- Rejection of salts: 99,4%

Characteristics:

- Compact equipment for water purification in accordance with the Regulation R.D. 140/2003 and recommendations of the World Health Organization (WHO).
- Purification system, Salher brand, with possibility of mounting on carbon steel structure, composed of the following elements, according to final use:
 - Microfiltration of 5 microns.
 - Feeding system to reverse osmosis composed of vertical centrifuge pump. Optional: frequency controller.
 - Skid equipped with spiral wound membranes (PA/PS) with high salt discharge, in sizes of 2,5", 4" and 8", and for any salt concentration type.
 - Automatic cleaning system through dragging –flushing–.
 - Conductivity meter for permeate control.
 - Electrical panel board for control and command of the treatment.
 - Set of accessories composed of interconnecting pipes between pieces of equipment, valves, sampling intakes, regulation and control systems, etc.
- GFRP STRUCTURE-SKID with hydraulic and electrical interconnection of the elements.

NOTE: PUR-MINIRO can be combined with other SALHER purification models to treat upper turbidity levels and or specific loads. Consult for more information.

OBSERVACIONES

*Plazos de entrega expresados en días laborables y a partir de la conformidad por nuestra parte del pedido.
Las condiciones generales de venta de Salher, están a disposición de nuestros clientes, en caso de duda.
En las primeras ventas, el plazo de entrega estará supeditado a la petición de informes bancarios salvo en operaciones de contado.*

*Depuración de Aguas Residuales Urbanas
Fabricación y Diseño de Depuradoras y Accesorios
Separadores de Hidrocarburos Certificados
Fabricación Depósitos en PRFV
Decantadores y Espesadores en PRFV*

Options:

- Equipment for dosage of anti-fouling (recommended above 8°HF).
- Equipment for prevention against free chlorine traces.
- Permeate recirculation system (as safety system).
- Flushing with permeate water (requires storage tank).
- Chemical cleaning unit –CIP– (recommended in long stops of the plant).
- Raw water tank. Functioning of the plant is independent of the water feed.
- Treated water storage tank.
- Mixing system.
- Treated water remineralisation system.
- Treated water disinfection system.

GENERIC SKETCH:
